TO WHOM IT MAY CONCERN.

We hereby wish to confirm that Diemersfontein Wine and Country Estate has been a client of FANG Fences & Guards as from early 2003. They were instructed to provide a perimeter fence and electrification system of high standard to meet the growing requirements and demands of a developing residential estate. This installation was erected in good time, maintaining a high standard of workmanship to the satisfaction of Mr. D M Sonnenberg the owner and developer of Diemersfontein.

Towards the latter end of 2003, a maintenance contract was negotiated to maintain and service the fence and all electrical systems installed. This was done to ensure that the investment in the security system would afford the necessary care and protection to all property owners. Over the years that followed to date, the maintenance as per contractual arrangement has been punctual and specific to achieve maximum efficiency and a long lasting life span for the fence and software.

All operational staff, managers and directors of FANG have been accommodating in all sense to provide a satisfactory and professional service to the developer and home owners.

We hereby strongly recommend FANG in their capacity as electric security fence providers to the industry at large.

Yours faithfully

  
FE Steytler

Estate manager

  
S Moore

Security manager
